Dear Commission

SW-04002A-04-0465  
WS-02987A-04-0465

The price increase that is being debated as we speak is very disturbing. When we bought this house a month ago there was no information shared with us or brought to our attention by the builder about this change. We have documents from the county and the builder that state the company that is going to provide the service and all the rates that go with the home. When we bought the home we thought the service for waste was ridiculous we pay more than twice what Mesa pays. Now to increase the price \$8.50; were did this figure come from? It states in the letter that the price increase is to cover higher level of customer service and support. We are talking about waste. I have never heard anyone have to call on there waste. If you got plumbing problems call the plumber. To justify having each customer pay 8.50 more a month when we are all ready paying sky high prices now, is out of this world. I think this needs to be re-thought, I want good service as much as the next guy but almost \$40.00 a month. If anything I think that people with a certain size house with more fixtures or something should pay more.

Sincerely

Jayson Harrison
